HP Business Intelligence

Intuitive data analysis tools to improve operation efficiency

Reduce your costs by managing your print environment with predictive analytics and proactive maintenance.

Use data to develop an efficient, sustainable printing fleet

Many organizations launch initiatives to improve the efficiency of their print environment, only to find that maintaining those improvements creates a whole new challenge. For every dollar spent on printing, another nine is spent managing.¹ The first step to driving down costs to a sustainable, efficient level for the long-term is discovering where your adjustments can make the biggest impact. That's where HP Business Intelligence can help, allowing you to collect and analyze data from across your entire fleet.

Meet your new tools of the trade

HP Business Intelligence provides a set of advanced tools and solutions that are available with your Managed Print Services agreement. HP will work with you to automate data collection and analysis so you can utilize the insights to be proactive with maintenance, identify opportunities to be more efficient, and find new ways to reduce expenses. And for any extra help, our HP experts use their experience to assess your needs and provide the ongoing support necessary to help you cut costs and improve productivity.

"For every dollar spent on printing, another nine is spent managing."¹

HP Device Connect

provides a remote access connection for gathering in-depth print data

HP Strategic Business Reviews

is a collaborative process to identify and help accelerate cost savings, and report on the actual value realized from your MPS contract

HP Device Control Center

offers a personalized view of your entire fleet, helping you directly manage your devices and gather data on-demand

HP Instant Fleet Insights

allows you to use advanced analytics to model, predict, and optimize your equipment's performance

HP Business Intelligence solution	Features	Benefits
