Enterprise Cloud Faxing
at a Small Business Price

The future of faxing is in the cloud. eGoldFax is a fully hosted cloud fax service that offers enterprise-class functionality at a price all businesses can afford.

Why Cloud Fax?

Faxing from the cloud offers many benefits over traditional faxing:

- ⊘ **Security:** End-to-end encryption ensures your fax transmissions are secure and meet regulatory compliance requirements including HIPAA, PCI, GDPR, FERPA, and more

- ⊘ **Scalability:** Because cloud faxing is not limited by the number of ports on a fax board, you'll benefit from additional fax capacity just when you need it

- ⊘ **Reliability:** Redundant telco carriers and infinite scalability mean you'll never miss a fax due to telco outages or busy signals

What Makes Us Different?

eGoldFax is an enterprise-class solution designed to meet the needs (and budgets) of small and mid-size companies.

Direct Integration with Your MFP

eGoldFax partners with the leading providers of Multi-Function Products (MFPs) to create a seamless and secure way to fax directly from any MFP including Sharp, Kyocera, Xerox, Canon, HP, Konica Minolta, Ricoh, Lexmark, and more.

Security is Our Top Priority

Access to the most robust security features on the market should not be limited to the largest organizations who can afford them. eGoldFax meets the highest standards for security and regulatory compliance for companies of all sizes.

Robust Security Features Built Right In:

- ⊘ **Enterprise-Class Transmission Backbone**: eGoldFax is built on Microsoft Azure, the cloud infrastructure relied upon by 90% of the Fortune 500

Microsoft Azure

- ⊘ **End-to-End Encryption:** Faxes are encrypted in transit using TLS 1.2 encryption

- ⊘ **PCI-Certified Data Center:** eGoldFax is PCI-DSS Level 1 Certified

- ⊘ **Compliance Standards:** Meets compliance regulations including HIPAA, GDPR, FERPA, and more

End-to-End Encrypted Faxing

Sensitive information contained on medical, financial, or legal documents is encrypted in transit using Transport Layer Security (TLS) 2.0 encryption, the industry standard encryption protocol, and ensures your company adheres to all industry compliance standards such as HIPAA, FERPA, GDPR, Sarbanes-Oxley, and more.

Secure Portal and Fax Archive

eGoldFax offers a secure portal to manage your account and authorized user list. View fax activity, reports, and manage inbound fax routing. Plus, unlike other cloud fax services, eGoldFax offers FREE, unlimited encrypted fax archive; faxes are retained as 256-bit Advanced Encryption Standard (AES) PDF files for up to 10 years.

Universal Access and No User Training

Send and receive secure faxes from your MFP, desktop computer or any mobile device. And no need to train users – faxes are sent and received directly through your users' email application.
