KYOCERA
CentraQ Pro™
& CentraQ™

MANAGING CRITICAL PROCESSES.

MOVING INFORMATION SECURELY AND EFFICIENTLY.

KYOCERA'S Centra Q Pro ENABLES USERS TO IMPROVE DOCUMENT SECURITY AND GAIN CONTROL OVER DATA AND PRINTING COSTS.

Your business depends on the continuous movement of information; managing your enterprise printing is critical to its success. Controlling costs, optimizing processes, and ensuring secure communications impact both your bottom line, as well as your ability to service your customers.

KYOCERA's print optimization solutions, CentraQ Pro and CentraQ maximize your hardware investment, providing the strength and functionality to gain control over data and printing costs while helping your employees work faster and more efficiently. CentraQ Pro is a powerful business application that brings cost-effective print management to your organization. It helps your business reduce printing costs by tracking usage, and supports environmental sustainability programs while keeping information securely protected. In addition, CentraQ Pro provides your administrators with the raw usage data they need to develop a transformative action plan to boost your print optimization initiatives.
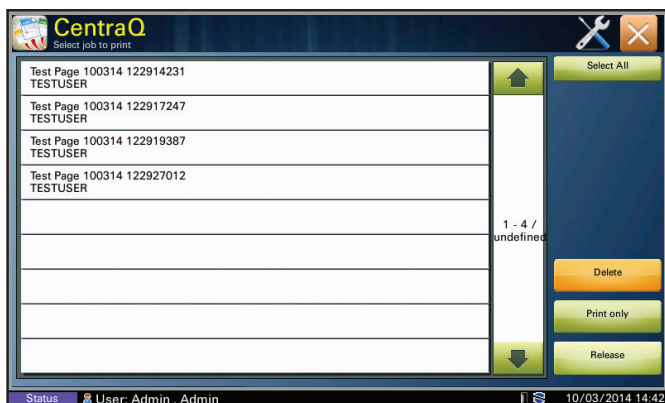

Advanced tracking capabilities across your organization's networked KYOCERA MFPs and printers helps administrators better manage their fleet to reduce costs and improve productivity. CentraQ Pro's usage tracking and cost accounting capabilities provide administrators the ability to see how much each department, user and device is costing the organization. This enables potential savings to be identified so realistic budgets can be set and managed. In addition, CentraQ Pro's secure print and QR code job release capabilities ensure confidentiality of documents sent to the device.

KYOCERA CentraQ Pro is a robust print optimization solution that ensures secure and advanced document printing, while helping businesses to achieve cost-saving and environmental sustainability goals.

› Reduces costs associated with unnecessary printing
› Mitigates security concerns of printed pieces left unattended at the device
› Supports green office initiatives
› Tracks usage to right-size printers accordingly

KYOCERA
Document Solutions

HyPAS®

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

At the MFP control panel, the user has the ability to view, print and keep, print and delete or just delete the job from the server.

HOW IT WORKS

CentraQ Pro and CentraQ allows users to send files to a print server, which can then be accessed from any designated printer or MFP on the network, where they are held in queue until released by the user for output. The application supports USB or Ethernet-connected card readers allowing users to quickly access secured jobs via their HID cards. On HyPAS enabled models, print jobs can also be released by entering a secure PIN at the device's control panel. A network-connected smartphone equipped with a QR code scanner application can be used to easily view and release secured jobs on any supported KYOCERA MFP or Printer.

Should your business require it, CentraQ Pro also facilitates the management of copy, scan and fax activities, requiring user authentication at the device's control panel prior to use. The application's flexible capabilities allow network administrators to custom configure authorization policies by individuals or groups.

CentraQ BRINGS DEVICE MANAGEMENT TO SMALL BUSINESSES

Designed for organizations that require document security, CentraQ provides secure job release functionality to minimize the risk of unauthorized access to confidential documents left at the device.

CentraQ Pro BENEFITS

› Supports KYOCERA HyPAS-enabled MFPs and ECOSYS printers
› Allows users to release print jobs from any enabled MFP or printer on the network*
› Helps protect confidentiality of documents
› QR code job release capability
› Reduce cost associated with paper and toner supplies
› Integration with HID card readers for secure job release
› Simplified reporting capabilities to assist with job tracking and usage reports

*Printers do not support PIN codes. They require a proximity card or QR code and smartphone.

SYSTEM REQUIREMENTS

PRINT SERVER

Supported Operating Systems

Windows Server 2008 (32 and 64bit), Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2

Hardware Requirements

2 GHz or faster processor (An i5 processor with at least 2 cores is recommended), 2GB of RAM. 4 GB RAM (Recommended), 5 GB of available hard disk space.

Supported Driver

KX Driver 6.0 and 6.1, Printer language: PCL-XL

DATABASE SERVER

Supported MS-SQL Servers

Microsoft SQL Server 2008 (SP1, SP2 and SP3), (32 and 64bit), Microsoft SQL Server 2008 R2 (SP1, and SP2), (32 and 64bit), Microsoft SQL Server 2012 (SP1 and SP2) , (32 and 64bit), Microsoft SQL Server 2014 (SP1, SP2 and SP3)

Supported Active Directory Servers

Microsoft Exchange Server, Microsoft Active Directory Server

Supported Protocols

LDAP V3, SSL/TLS

PRINT CLIENT

Supported Operating Systems

Windows Vista (32 and 64bit), Windows 7 (32 and 64bit), Windows 8 (32 and 64bit), Windows 8.1, Windows Server 2008 (32 and 64bit), Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2

Hardware Requirements

1 GHz or faster processor, 512 MB of RAM, 500 MB of available hard drive space
